

# MENTAL HEALTH AWARENESS DAY

Presented by: Allied Trades

The Allied Trades Assistance Program invites you to join us for our Mental Health Awareness Seminar. This day will allow us to raise awareness about mental illness, decrease the stigma and increase knowledge. This seminar will provide information surrounding mental health disorders, suicide, and related concerns. Over the past year, we have been faced with unprecedented challenges because of the pandemic. We are opening the invitation to all who are wanting further education on assisting members and their families through these times.
